Blank Diagrams

Booth Diagrams are **Required** for the following:
- Booths that have drops outside of the standard placement (back center of the booth)
- Island Booths

The following blank diagrams are for you to mark where you would like your items to be located.
These items include:
- Electrical Drops
- Wired Internet Drops
- Compressed Air Drops
- Water/Drainage

To ensure an accurate install, please make sure all parts of the diagram are filled out. This includes:
- Your information (show, exhibiting name, booth number, on-site contact name and number)
- Marking the drops within the grid for all your ordered items (electrical, wired internet, air and water/drainage)
- Notating the neighboring booths around you (this will guide the teams so your items will be facing the right way)

If you have any questions, please reach out to us at gh.dengr.grexhibits@gaylordhotels.com.

Please note, for all custom installs outside of standard placement (back center of booth), we require a booth layout. Any changes made on-site may accrue additional fees.
